## Mission

We are an organization that designs and executes integral solutions in mining projects, maximizing the profitability of our resources and contributing to staff development through prioritizing safety standards and meeting our corporate social responsibilities.

## Vision

To be recognized as one of the top specialists in design and execution of integral solutions for the mining industry and a preferred partner in all mining projects, by providing services with high standards in safety, quality, productivity, and continuous innovation.

## Values

- **Safety Culture**

We provide to our employees the necessary safety tools to execute their work in strict compliance with safety standards, zero tolerance to harm, and to develop a corporate culture of risk prevention.

- **Team Work**

All our colleagues make the difference. When we share our skills, knowledge, and experience we become one united team. We are on this great shared challenge together.

- **Integrity**

We believe that nothing is more important than our reputation, we adhere to strong moral and ethical principles. The highest level of integrity is fundamental to who we are.

- **Quality**

We aim to achieve ambitious goals, passionately ensuring that our services reflect a legacy in the mining industry.

- **Commitment**

We take our responsibility as a company and individuals to achieve the best results in all the entrusted tasks.

- **Innovation**

We observe, investigate, and create transformation in our value chain to make our solutions sustainable.

- **Trust**

We are efficient and have integral business knowledge to obtain successful results in our client's projects and operations.
